# The original DECITEX RANGE NOW AVAILABLE from SABCO PROFESSIONAL

#### A MESSAGE FROM DECITEX

Since 2000, Decitex has been at forefront of research and development, manufacturing and adaptation of high-tech textiles that deliver hygenic professional flat mopping solutions.

Pioneers in engineering innovative smart textiles, the patented Ultimate Technology means Decitex mop pads can be used from the operating room to your working environment with confidence.

"At Decitex we are constantly seeking to innovate while improving the design and carbon footprint of each of our products. Since launching the first disposable microfiber mop on the market in 2003, Decitex patented the "Ultimate Technology" giving our mop range the highest content of microfiber in the market. In 2007, Decitex launched the first light weight mop that has become a reference in Europe to clean floors in many major hospitals with water only. The latest generations of these advanced mops are now made of 100% recycled polyester and can reach up to 99.999% bacteria reduction based on EN16615.

Our vision is to develop and supply products that allow for a healthier world, cleaned without chemicals. From 2025, Decitex embarks on a new chapter within Australia and New Zealand and we are proud to be partnering with Sabco Professional."

#### **Nils Riancho**

Engineer - Technical Textiles

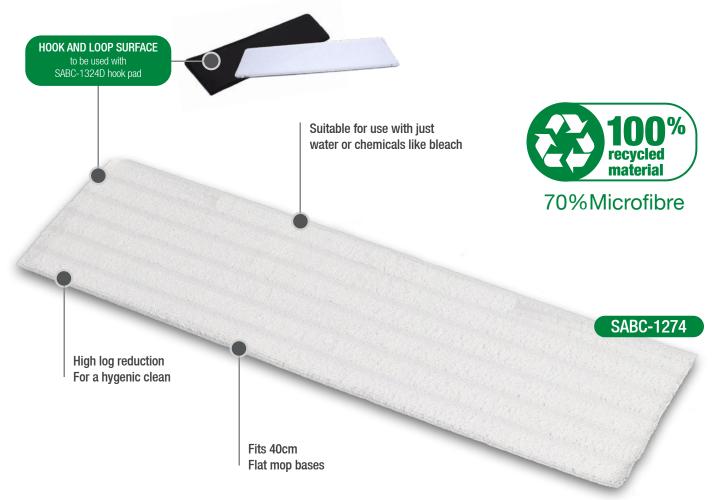

Managing Director DECITEX - Smart textiles

A technical advance in microfibre engineering, simultaneously increasing the proportion of pure microfibre to increase absorbency and cleaning efficiency, whilst optimising the ergonomic glide across floor surfaces.

**ULTIMATE** PATENTED TECHNOLOGY

## 100% RECYCLED MICROFIBRE DISPOSABLE FLAT MOP PADS

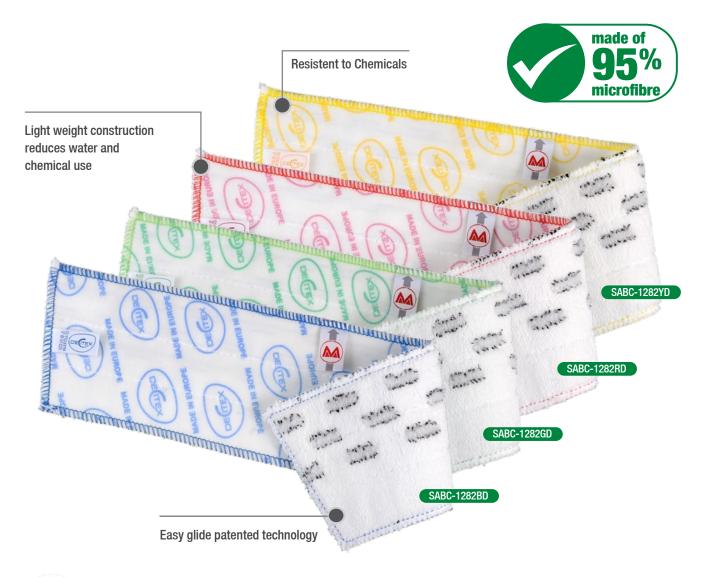

#### HIGH QUALITY KNITTED FABRIC PRODUCING A HIGH LOG REDUCTION

- Single use microfibre pads that are ideal for high risk areas such as aged care, healthcare, BSC & food environments
- Up to 100m2 coverage from each pad when using a water fed pole
- Suitable for dry or damp mopping with water or with chemicals
- · Reduces the need for heavy buckets of water

- · Bleach safe
- Low micro-particle loss rate
- Tested (based on EN16615 standard which demonstrates a 4.34 log reduction ie >99.99% (Staphylococcus aureus)
- · For use with hook & loop mopping systems
- Engineered and manufactured in Europe

### **DECITEX ULTIMATE DX1**MICROFIBRE FLAT MOP PADS

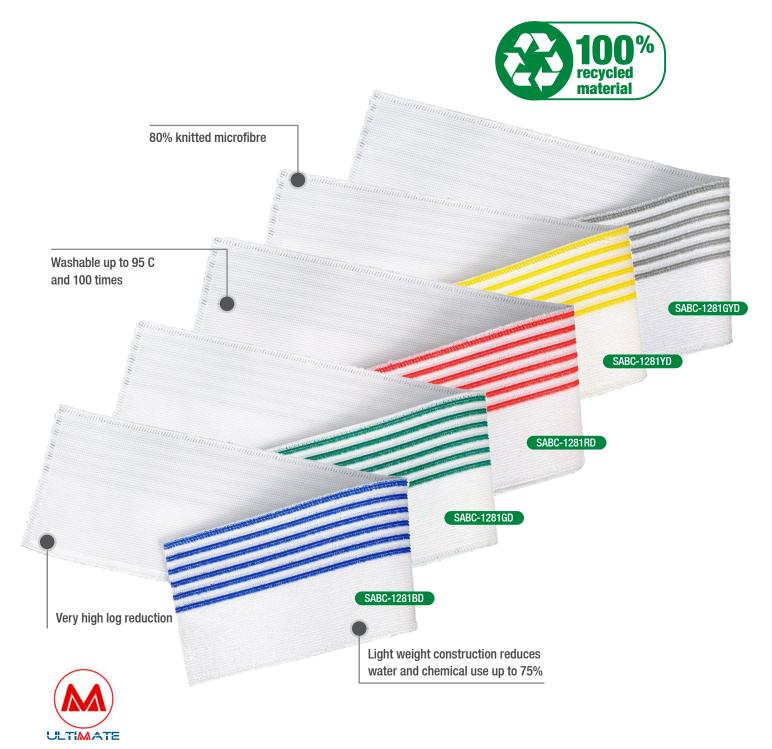

### PATENTED TECHNOLOGY MAKES IT GLIDE EASILY OVER FLOORS

- Ultimate technology boosts efficiency (high proportion of microfiber 95%), allowing it to glide easily over most non slip floors
- · Easy glide patented technology
- Reuseable can withstand high washing and drying temperatures - up to 95°C
- · Resistent to chemicals
- Ergonomic Design reducing the risks of injury

- Lightweight design reduces water and chemical useage
- Tested (based on EN16615 standard) which demonstrates a high log reduction
- Significantly reduces the carbon footprint (1.47 Kg CO2e during the first 100 washes)
- Engineered and manufactured in Europe

### DECITEX ULTIMATE 3D INFINITE MICROFIBRE FLAT MOP PADS

#### **REDUCES WATER AND CHEMICAL USE**

- Made entirely from recycled polyester yarns / materials
- · Reuseable with an extremely low micro-particle loss rate
- 80% Knitted microfibre
- · Resistent to bleach
- Can withstand high washing and drying temperatures up to 95°c
- · Ergonomic design reducing the risks of injury

- Lightweight construction reduces water and chemical useage
- Tests (based on en16615 standard) which demonstrate a 5.13 log reduction of 99.99% (Staphylococcus aureus)
- Significantly reduces the carbon footprint (1.28 Kg CO2e during the first 100 washes)
- Engineered and manufactured in Europe

### **DECITEX ULTIMATE DUO**MICROFIBRE FLAT MOP PADS

#### **GLIDE EASILY OVER MOST NON SLIP FLOORS**

- Ultimate technology boosts efficiency (high proportion of microfiber 70%), allowing it to glide easily over most non slip floors
- · Easy glide patented technology
- · Reuseable can withstand high washing and drying temperatures
- · Resistent to chemicals

- Ergonomic design reducing the risks of injury
- Long lasting (600 washes)
- Tested (based on EN16615 standard) which demonstrates a high log reduction
- Engineered and manufactured in Europe

#### DECITEX SMOOTH SURFACE FLAT MOP PADS

Can be used with water alone reducing chemical use

#### **IDEAL FOR WINDOWS, MIRRORS AND STAINLESS STEEL**

- 100% Microfibre 70% Polyester 30% Polyamide
- · Easy glide microfibre technology
- Use with 30cm aluminium flat mop frame
- Engineered and manufactured in Europe

## **DECITEX FLUID II BACTERIOSTATIC**FLAT MOP HANDLE

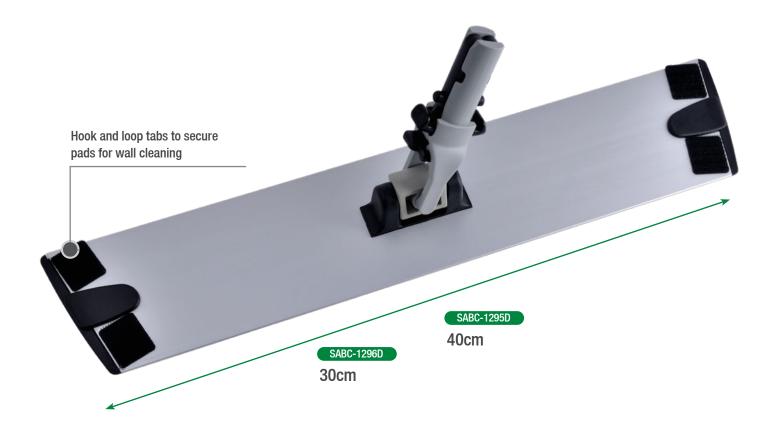

### DECITEX DX TELESCOPIC HANDLES

Ergonomic swivel design Extendable up to 1.6m
