- Twist pile microfibre designed to effectively remove microbes, dirt, dust and grime.
- Made from bleach resistant yarn with unique antibacterial treatment for superior removal of bacteria during washing.
- Can be washed up to 500 times.
- Launderable up to 90 degrees.

- Tumble dry safe up to 54 degrees.
- Up to 30m square coverage from each pad.
- Suitable for use with just water or with chemicals.
- Suitable for dry or damp mopping.
- Suitable for use with hook and loop mopping systems.

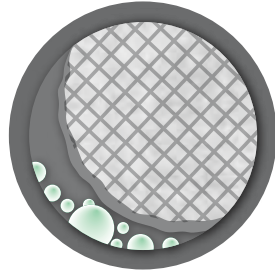

**COLOUR CODING**

Sabco Professional offer an extensive colour coded range of products to ensure the right product is used to clean the right area, minimising the risk of cross contamination.

### MICROFIBRE

Microfibre will trap microbes, dirt, dust, grime and moisture within, lifting them away from the surface for a superior clean. Result: surface is hygienically clean, dry and polished.

### COTTON FIBRE

Cotton fibres push dirt particles across the surface, rather than lifting them away. Result: surface is still dirty and wet.

# All About Microfibre

### WHAT IS MICROFIBRE?

Microfibre is processed mechanically and chemically to be broken in finer parts, 1/100<sup>th</sup> the diameter of a human hair. What defines a microfibre is its size: a microfibre must be smaller than one denier, which is a unit of linear measurement equal to the mass in grams of 9,000 meters of the fibre.

### WHAT IS THE DURABILITY OF SABCO PROFESSIONAL ULTRACLEAN MICROFIBRE FLAT MOP PADS?

Sabco Professional UltraClean Microfibre Flat Mop pads can be washed up to 500 times without incurring excess wear on the product. Traditional mops are unusable after 70 to 90 washes. During the drying process, temperatures are often lower as microfibre only needs to be semi dry - never fully dry microfibre in the dryer. Expected drying time is typically 30-40 minutes or 20 to 30 minutes if the dryer is set to a higher temperature.

### WHAT IS THE DIFFERENCE BETWEEN USING A FLAT MOP PAD AND A TRADITIONAL COTTON WET MOP?

Microfibre reaches into the tiny pockets in the surface. It grabs and holds onto microbes, dirt, dust, grime & moisture. Cotton mops can smear the bacteria, dirt and debris leaving the surface still dirty and wet.

### CAN YOU USE FABRIC SOFTENER WITH OUR MICROFIBRE?

No, fabric softener liquid is not recommended as it doesn't rinse off from the microfibre pad. Fabric softener liquid can leave a coating over the microfibre pads which can cause them to become waterproof. This coating also reduces the capability of the microfibre to trap dirt and grime.

### ARE SABCO PROFESSIONAL ULTRACLEAN MICROFIBRE FLAT MOP PADS LINT FREE?

Yes.

### HOW MANY SQUARE METERS CAN ONE PAD CLEAN?

Each Sabco Professional UltraClean Microfibre Pad will clean a standard patient's room or up to 30 sq metres before changing to a new microfibre pad.

### CAN MICROFIBRE FLOOR PADS & CLOTHS BE WASHED AT THE SAME TIME?

Yes, although pads and cloths should be in separate laundering bags.

### SABCO PROFESSIONAL ULTRACLEAN MICROFIBRE ANTIBACTERIAL FLAT MOP PAD

#### ABSORBANCY

High

#### LIFE SPAN FOR LAUNDERING

500 washes / 300 with bleach

#### BLEACH SAFE

#### LAUNDERED UP TO 90°C
